Total Amount Due by 04/03/19

\$117.17

Electric Account Summary

Amount Due On 04/05/19	\$117.48
Last Payment Received On 04/04/19	-\$13.48
Balance Forward	\$0.00
Current Charges/Credits	
Electric Supply Services	\$61.50
Delivery Services	\$35.40
Total Current Charges	\$117.51
Total Amount Due	\$117.51

Total Charges for Electricity

Supplies (Eversource Basic Rate Plan)

Generation Service Charge	453 kWh x 1.3000	\$61.50
Supplier Supplier Services		\$61.50

Delivery (Rate AT R1 RESIDENTIAL)

Customer Charge		\$7.50
Distribution Charge	453 kWh x .002000	\$0.91
Transmission Charge	453 kWh x .000000	\$0.00
Transmission Charge	453 kWh x .002000	\$1.71
Reserved Dispatching Charge	453 kWh x .000000	\$0.00
Reimbursed Solar Charge	453 kWh x .000000	\$0.00
Reimbursed Energy Charge	453 kWh x .000000	\$0.00
Storage Efficiency	453 kWh x .001700	\$0.77
Summed Delivery Services		\$10.92
Total Cost of Electricity		\$117.17
Total Current Charges		\$117.51

Eversource is required to comply with Department of Public Utilities "Utility and Metering" regulations. If you have a dispute please use the toll-free number for more information. "Utility and Metering" regulations can be found at: www.eversource.com. Eversource also has a "Utility and Metering" section on its website. Eversource offers Payment in Place for customers with overdue bills. Eversource is also available to use a more compact bill each month. Please see the Customer Reply Statement for more information.

Photo of Property Approach

A photograph showing the entire building from the road side. This image needs to show the full roof AND anything that is visible from on top of the roof

CORRECT IMAGE

In this image you can clearly see the entire roof and its access point

WRONG IMAGE

In this image all we can see is the front door, we cannot see where we could get access to the roof and any obstacles in the way.

Street View Photograph

Photo 2

Parking

A photograph of where we will be able to park

Parking Photograph

Photo 3

Front door from 10m away

Unloading Area

An area where items can be unloaded in a safe and unrestricted manner.

Keep in mind that the solar kit could be delivered a couple of days in advance and needs a safe place to be kept.

Front Door and Compass Photograph

Photo 4

Access Point

How do we take all equipment to the property?

If there is no outside access and we need to go through the house. We need to ensure that we have pictures of a clear route. This can be illustrated/communicated through multiple photographs.

Unloading Area Photograph

Photo 5

Scaffold Access 1

Point of access to scaffolding. Clear path to target roof.

Clearly shows that there is outside access onto the property for scaffolders to get to the target roof. If there is no outside access, and we need to go through the house. We need to ensure that we have pictures of a clear route. This can be illustrated/communicated through multiple photographs.

Is there another main roof section that requires measurements?

No

Are there any chimneys on any roofs?

No

Are there any obstructions on any roofs?

No

Inverter Location Photograph

In the corner of the cabin

Photo 19

Battery Location Photograph

On the floor here in the cabin

Photo 20

The installer would prefer as much of the cable route to go on the outside of the property. This is to prevent internal disruption. Discuss solutions with the customer so they're fully aware of the route and then explain below and answer the indoor / outdoor questions and take photographs showing the full cable route from solar panels to the main electric meter.

DC CABLE Route Length

4m

Proposed cable route description

AC supply cable to run outside down the garden

AC swa 10mm to run from under the stairs and down outside the garden fence. Will need an AC supply to the inverter, cat5 for the CT clamp.

Photo 21

Photo 22

Photo 23

Is an Indoor Cable Route Required?

No

Is an Outside Conduit / Cable Route Required?

Yes

A supply cable will be required to run from the main CU in the house to the cabin where there inverter is going at the back of the garden. There is an existing 2.5mm flex connected directly into the Henley block supplying the sub board!! (Not regulation) very unsafe. We need to run in a 10mm swa to supply the shed Sub board, replacing the existing cable. If the customer is having a manual change over switch. The 10mm swa will need to be a 5core.

Best proposed conduit route photographs - showing full route clearly

N/A

Length of external cable route

45m AC supply cable run

Electric Meter Photograph

Photo 24

DNO Fuse Rating Photograph

60a

Photo 25

DNO Fuse Seals Photograph

Photo 26

Main Tails Photograph

Photo 27

Isolator Switch Photograph

N/A

Show the full consumer unit (fuse board) clearly. Multiple pictures from a distance and close up

Consumer Unit (Fuse Board) Photographs

The existing sub board in the garage need to be replaced with a new 6way board.

There is space and a spare way in the main DB to connect in the garage supply, just need a 40amp wylex MCB

Photo 28

Photo 29

Photo 30

Is the gas and water bonding in place?

Yes

Photo 31

EV Location Photograph

Best proposed EV charger cable route photographs- showing full route clearly

N/A

Access to EV Charger Photograph

** Reminder - Electricity bill **

Is this a Battery Storage Installation?

No
